

Vicodin (Hydrocodone) Withdrawal Patch - Outpatient Treatment

The Vicodin (Hydrocodone) withdrawal patch provide relief within 15 minutes and up to 72 hours. Depending on the Vicodin (Hydrocodone) withdrawal symptoms you can apply more than one patch to the upper left hand shoulder. The upper left hand shoulder has a better connection to your central nervous system. Vicodin (Hydrocodone) Withdrawal Patch has no drugs and no chemicals so you are 100% safe from any reactions to any current drugs or chemicals in your body.

Unlike other opioid pain relievers, Vicodin can be especially dangerous for the liver. Large doses of acetaminophen were found to cause severe allergic reactions and liver damage in many people, and several people who took over 325 mg of acetaminophen consistently often ended up in the emergency room due to overdose.

Apply the **Vicodin (Hydrocodone) Withdrawal patch** if you are experiencing any of these symptoms:

Intense craving for hydrocodone.

Diarrhea.

Insomnia.

Depression.

Dilated pupils.

Intense sweating.

Runny nose.

Chills.
