

## Pain & Inflammation Bio Energy Patch

Take away Medical Cannabis, ( CBD ) and use Pain & Inflammation Bio Energy Patch

This Pain & Inflammation Bio Energy Patch is designed to address inflammation in the body that causes most pain syndromes. Provides essential bio-frequencies designed to stimulate nerves and block pain signals being sent by the injury site.

**Application:** Consider using when experiencing: Pain associated with normal activity, leg cramps, back pain, shoulder pain, knee pain, carpal tunnel, achy joints, ankle pain, pain when walking and lack of energy.

**Use in conjunction with:** Bio Energy Patches that can be used to boost effectiveness and in conjunction with Pain & Inflammation Patches are: Healing XL, Circulation, Cleanse, D-Tox, Digest, Nerve Stim, VIR, Ultra Joint, GSH-Scar Tissue, Power Workout and Energy Balance.

**Tips:** The Pain & Inflammation has been designed to address pain and inflammation in the body without the use of sometimes harmful and addicting medication. This patch may be placed directly on the area of pain (clean, dry, unbroken, non-hairy skin), **and additional patches may be added for severe pain.**

The Pain & Inflammation Bio Energy Patch has been programmed with the frequencies of natural pain fighting herbs, such as Turmeric, Ginger root, Encomia bark, including Medical Cannabis, ( CBD ) to support the way the brain and body handle stress, and long term chronic pain.

Although separate conditions, pain and inflammation are nearly always associated with each other. Pain is defined by the

International Association for the Study of Pain (IASP) as 'an unpleasant sensory and emotional experience associated with actual or potential tissue damage, or described in terms of such damage'. Inflammation is the tissue's immunologic response to injury, considered by mobilization white blood cells and antibodies, swelling, and fluid accumulation.

There are two basic types of pain: chronic and acute. Acute pain often results from disease, inflammation, or injury to tissue. This type of pain is generally self-limiting; it is defined to a given period of time and severity. In some rare instances, it can become chronic. Chronic pain is widely believed to represent a disease itself. Like pain, inflammation can be both acute and chronic.

The Pain and Inflammation patch can help ease a wide range of minor aches and pains, from sore muscles to menstrual cramps. This patch has been designed to address pain and inflammation in the body without the use of harmful and addicting medication.
