

New Bio Energy Patch Hopes to Provide Alternative to CBD Products

Natural Remedies is a wellness-focused company that actively encourages the use of natural remedies to treat mental and physical conditions. Their new Bio Energy Patch was designed to provide the body and muscles with healing and restorative frequencies.

Modern man faces a plethora of pains and illnesses that our ancestors did not know. Many in the scientific community attribute the low health of Americans to a stressful modern lifestyle and even what is now called "The Sitting Disease". These metabolic syndromes have been [associated by research scientists](#) with negative effects upon muscles, immune systems, and neurology. Many people will look to over the counter remedies, pharmaceutical aids, and even CBD (cannabis based oils) to treat many of these ailments. While CBD has been proven to have an effect on the body system, not all states will allow its use or sale, and the effectiveness has been limited by the distillation process. Natural Remedies has created a patch which mimics the frequency of CBD and can be used to treat ailments of muscle and the central nervous system.

"Most of us have worked in the field of medicine before coming to Natural Remedies," says spokesperson NAME. "Some came from drug rehabs, others from the psychiatric community, but all of us shared the desire to find alternative treatment modalities that could benefit people who suffer from chronic or indeterminate ailments. This patch mimics the frequencies of cannabis, without some of the side effects or for people who may not wish to engage in cannabis-based products."

This medical cannabis alternative is designed with frequencies that help the body to achieve maximum relaxation. When the body is relaxed, it is without stress. It can restore itself and its immunities. These frequency patches were designed specifically for this purpose; to help the body "re-energize" itself, and restore natural health and rhythm. Wearers of the patch cite increased mood and better sleep. The Bio Energy patch is worn on the upper left shoulder and is made from "a specialized Biofeedback material designed for NASA to inner line the space suits."
